Summary

Motivated Full-Stack Web Developer with hands-on experience building and deploying web applications using **React**, **Node.js**, **Express.js**, **MongoDB Atlas**, and **Firebase Authentication**. Passionate about creating responsive applications and eager to contribute to a collaborative software development team.

Education

BSC Physics University of Kerala	2018 – 2021 Alappuzha
--	--------------------------

Skills

Languages

HTML5, CSS3, JavaScript (ES6+), C

Backend

Node.js, Express.js, REST APIs

Authentication

Firebase Authentication

Frontend

React, Vite, Bootstrap, Responsive Web Design

Database

MongoDB Atlas

Tools

Git, GitHub, VS Code, Postman, Render, Vercel, Netlify

Projects

Expense Tracker [🔗](#)

React • Node.js • Express.js • MongoDB Atlas • Firebase • Vercel • Render

- Built and deployed a full-stack expense tracking application with secure **Firebase Authentication**.
- Developed **REST APIs** using **Express.js** and **MongoDB Atlas**.
- Implemented **CRUD** operations for *expense* management.
- Connected the frontend to a deployed backend hosted on **Render**.
- Deployed the frontend on **Vercel** and configured production environment variables.
- **GitHub Link:** <https://github.com/maryaleenadas/Expense-Tracker> [🔗](#)

Netflix Clone [🔗](#)

"Netflix-style Clone showcasing UI and Firestore"

- Developed a Netflix-inspired streaming application using React.
- Implemented **Firebase Authentication** for secure user login.
- Integrated Firestore to manage application data.
- Built **responsive UI** components for desktop, tablet, and mobile devices.
- Enhanced user experience with dynamic content rendering.
- **GitHub Link:** <https://github.com/maryaleenadas/Netflix-Clone> [🔗](#)

Olx Clone [🔗](#)

"Frontend Marketplace Project with Product Listings"

- Developed a marketplace application replicating OLX's core features.
- Implemented **CRUD operations** for product listings using **Firestore**.
- Designed responsive UI components for posting, browsing, and searching items.
- Integrated user authentication and dynamic data handling with **Firebase**.
- **GitHub Link:** <https://github.com/maryaleenadas/OLX-Clone> [🔗](#)

Todo App [🔗](#)

"Task Management App with CRUD Functionality"

- Built a simple task management application with **CRUD functionality** (Create, Read, Update, Delete).
- Implemented **JavaScript** for dynamic task handling, **DOM manipulation**, and interactive features.
- Utilized **Local Storage** to persist tasks across browser sessions.
- **GitHub Link:** <https://github.com/maryaleenadas/My-Todo-App> [🔗](#)

The Weather App [🔗](#)

"Real-Time Weather Data using HTML, CSS & JavaScript"

- Built a responsive weather application using **HTML**, **CSS**, **JavaScript**, and a public weather **API**.
- Implemented city-based search with dynamic display of temperature and weather conditions.
- Designed a clean and mobile-friendly user interface using **bootstrap**.

Portfolio Website [🔗](#)

- Designed and developed a responsive personal portfolio website.
- Showcases projects, skills, and contact information.
- Hosted using GitHub Pages.
